Description

"NIBE Heating" - the market leader of wood-burning stoves in Sweden. The products of this company are famous for their quality and efficient combustion technology.

The top of the stove is aluminum, with the woodshed under the stove.

Specificities:

- clean glass system - thanks to more efficient fuel burning technology, the fireplace core is particularly economical, soot formation - minimal;
 - stove meets the particularly high environmental requirements and low emission standards, regardless of the heating capacity;
 - firewood used for heating - up to 33 cm length;
 - heated surface 120 m²;
 - doors are made from cast iron;
 - combustion chamber lined with vermiculite bricks;
 - Combustion air is supplied from outside or from a nearby room. This way, the air in the stove always stays fresh;
 - moving grates and the ash box;
 - the stove is connected from top or from the back;
 - combustion chamber is made from high quality steel.
- The stove body has a 5-year warranty.
