**Manufacturer:** Silca  
**Height, mm:** 200  
**Width, mm:** 80  
**Depth, mm:** 100  
**Item type:** Impregnantas  
**Warranty, year:** 24

Description

SILCADUR-HTI is a high-temperature resistant impregnation for application on our calcium-silicate products for surface consolidation and dust bonding. The impregnation is inorganic, odour-neutral and suitable for additional surface treatment of the SILCA® 250KM boards in the heating chamber. The impregnation is not suitable as first coat for subsequent plastering and bonding in the constructive area – for this application SILCACON first coat is to be applied. SILCADUR-HTI is very easy to handle, it is ready for use and can be applied by brush or spraying device.
