Purpose:

Description

“NIBE Heating” - the market leader of wood-burning stoves in Sweden. The products of this company are famous for their quality and efficient combustion technology.

The body of the stove is covered with soapstone, which accumulates and emits gentle heat to the environment after the firewood has finished burning.

Specificities:

- clean glass system - thanks to more efficient fuel burning technology, the fireplace core is particularly economical, soot formation - minimal;
- stove meets the particularly high environmental requirements and low emission standards, regardless of the heating capacity;
- firewood logs used for heating - up to 33 cm length;
- heating capacity - up to 120 m²;
- doors are made from cast iron;
- the combustion chamber is covered with vermiculite bricks;
- Combustion air is supplied from outside or from a nearby room. This way, the air in the stove always stays fresh;
- moving grates and the ash box;
- the stove is connected from top or from the back;
- adjustable power: 3-7kW.

The stove body has a 5-year warranty.
