Description

Electric boiler with three power levels 3x2kW.

The boiler is equipped with a convenient controller consisting of 7 segments and LEDs that indicate the displayed parameter on the screen.

The boiler is only intended for room heating without the possibility of preparing hot water in a separate tank.

Technical characteristics:

The power is regulated within the limits: 2-6kW;

connection for hydraulic installation: G 3/4" from the bottom;

integrated circulation pump Wilo-Para MSL/6-43/SC, 8 liter expansion vessel;

built-in safety valve;

temperature range 10-80°C, safety thermostat is activated when the temperature reaches 95°C

The boiler can be controlled by a remote room thermostat.
