### About the product

**Manufacturer:**  
**Country of origin:**  
**Height, mm:** 680  
**Width, mm:** 460  
**Depth, mm:** 460  
**Efficiency class:**  
**Made of:**  
**Item type:**  
**Water volume, ltr:** 63  
**Mounting type:**  
**Max. working pressure, bar:** 3  
**Warranty, year:** 2

### Description

The accumulation tank is suitable for installation in one system with heat pumps in order to limit the on/off of the pump.

The accumulation tank is made of carbon steel and can be installed in a system that uses water or glycol.

Maximum working temperature 95°C

The tank is connected directly to the heating system, into which no air enters, so no additional protection against corrosion is required.

The possibility of installing a temperature sensor.

The body is insulated with polyurethane foam insulation, which reduces thermal losses.

This tank can also be installed in systems with passive cooling.
