Width, mm: 940

Depth, mm: 685

Description

Characteristics:

- the interior of the fireplace core is covered with fireclay. It withstands the temperature of 1350°C, thus extending the burning time of the fireplace core and even after the end of burning, it accumulates heat for a long time;
- when the door is raised, the air supply to the combustion process is automatically regulated;
- the collector has four Ø 125 mm outlets in the upper part for connecting channels; • a high-quality door lifting mechanism reduces the noise level when the door is turned vertically;
- the height of the legs is adjustable;
- possibility to connect air supply from outside;
- the fireplace core is equipped with a cover, in the corners of which the ducts can be connected to transfer heat to other rooms; if the channels are not needed, the openings are left closed;
- the pulling force is regulated by the valve, the control handle of which is installed on the right side of the fireplace core;
- the firewood holder is cast from high-quality cast iron (+1100°C);
- suitable firewood with a length of up to 75 cm;
- the door can be raised.

The fireplace core has a 5-year warranty.
