

Gas fireplace MERCURY L, straight glass (1064x400)

Product code: Z2AKO-NV120F1
Category: Fireplaces > Gas fireplaces

PRICE : €4,399.20

About the product

Manufacturer: AKOS
Height, mm: 1239
Width, mm: 1202
Depth, mm: 394
Efficiency class: A
Efficiency: 84,00
Made of: plieno
Fuel type: dujos
Chimney diameter, mm: 130/200
Shape of glass: tiesus
Item type: atveriamomis durlėmis
Warranty, year: 120

Description

Gas fireplaces are equipped with a stage burner. The power of the first stage is 5,0kW, the second stage increases the power to 10,0kW. The power of the fireplace is controlled by the controller Metric GV-60. The desired temperature of the room is set on the control panel.

The fireplace corresponds to the A energy efficiency class.

The fireplace is connected to the chimney with a 130/200 mm diameter chimney. The combustion products (smoke) are removed through the inner diameter of the chimney, and combustion-supporting air is supplied through the outer diameter, so that the air in the fireplace remains fresh.

The set includes legs and brackets for hanging on the wall, so you can lay the fireplace on a stand or mount it on the wall.

The fireplace can be equipped with a natural gas or liquid gas burner. When ordering, you should specify which gas will be used.

The fireplace is without a frame to block part of the burning fire.

The price includes: control panel, two-stage burner, hearth glass, decorations for the burning hearth: firewood or pebbles (white/grey).

In addition, you can order an online control module (WIFI), internal walls and reflective glass for the burner.

The burner has a 10-year warranty.

Finishing of the fireplace is not included in the price.
